

Highlight-text Quarto Extension

This is a Quarto extension that allows to highlight text in a document for various format: HTML, LaTeX, Typst, and Docx.

Installing

```
quarto add mcanouil/quarto-highlight-text
```

This will install the extension under the `_extensions` subdirectory. If you're using version control, you will want to check in this directory.

Using

To use the extension, add the following to your document's front matter:

```
filters:  
- highlight-text
```

Then you can use the span syntax markup to highlight text in your document.

```
[Red]{colour="#b22222" bg-colour="#abc123"} # UK  
[Blue]{color="#0000FF" bg-color="#ABC123"} # US
```

Font Colour

```
[Red text]{colour="#b22222"}
```

Red text

```
[Blue text]{color="#0000FF"}
```

Blue text

Background Colour

```
[Red background]{bg-colour="#b22222"}
```

Red background

```
[Blue background]{bg-color="#0000FF"}
```

Blue background
